

Neanderthal Report

DEMO REPORT

Your neanderthal index is:

1.50%

You inherited 508 of 4454 identified neanderthal variants

Neanderthals, also Neandertals, *Homo neanderthalensis* or *Homo sapiens neanderthalensis*) are an extinct species or subspecies of archaic humans who lived in Eurasia until about 40,000 years ago.

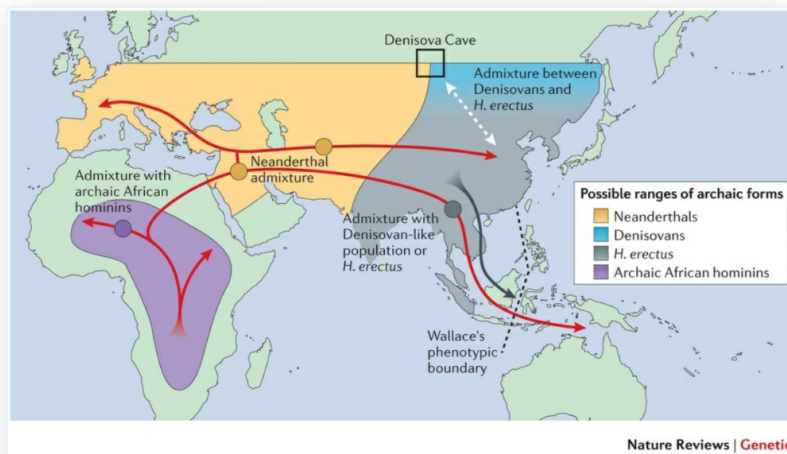

They most likely went extinct due to competition with, or extermination by, immigrating European early modern humans or due to great climatic change, disease, or a combination of these factors.

It is unclear when Neanderthals split from modern humans; studies have produced various intervals ranging from 315,000 to more than 800,000 years ago. The time of divergence of Neanderthals from their ancestor *H. heidelbergensis* is also unclear. The oldest potential Neanderthal bones are dated to 430,000 years ago, but the classification is uncertain. Neanderthals are known from numerous fossils, especially from after 130,000 years ago. The type specimen, Neanderthal 1, was found in 1856 in the German Neander Valley. After much debate over their validity, Neanderthals were depicted as being primitive, stupid, and brutish for much of the early 20th century. Although knowledge and perception of them has markedly changed since then in the scientific community, the image of the unevolved caveman archetype remains prevalent in popular culture.

Some traits that modern humans inherited from neanderthals

- Occipital bun
- Elongated skull
- Space behind the wisdom teeth
- Supraorbital ridge or brow ridge
- Broad, projecting nose
- Little or no protruding chin
- Rosy cheeks
- Wide fingers and thumbs
- Straight, thick hair
- Immunity against Eurasian pathogens
- Increased risk of Type 2 diabetes
- Increased risk of Crohn's disease
- Nicotine addiction

Your Neanderthal Traits

Find out how the neanderthal DNA you inherited influences you

You are less likely to prefer salty foods over sweet

Found 3 of 8 variants

You are more likely to be better sprinter than distance runner

Found 2 of 10 variants

You are more likely to tolerate the Sun

Found 2 of 2 variants

You are more likely to have fear of public speaking

Found 1 of 2 variants

You are less likely to have a fear of heights

Found 1 of 4 variants

You are less likely to have restless leg during sleep

Found 1 of 2 variants

Traits you neither inherited nor were found in your DNA file
